RAILROAD PRODUCTS **UK**

PERFORMANCE IMPROVEMENT PARTNER

Improve reliability, efficiency and safety in railway operations and maintenance.

Unipart Rail and Racine Railroad Products UK are working in partnership to introduce a range of groundbreaking new battery powered tools for the maintenance and enhancement of the rail infrastructure. The product range provides an innovative and sustainable approach to operations by reducing the reliance on traditional power sources.

Racine Railroad Products UK, a pioneer in innovative rail maintenance products, is a division of Racine Railroad Products Inc., who have been designing, manufacturing and servicing quality maintenance-of-way equipment since 1970.

T-Handle Impact Wrench

Features and Benefits

- Sustainable solutions reducing the use of fuel
- Zero emissions generated
- Battery powered - one battery fits all tools
- Tools are portable allowing access to restricted environments
- Lightweight and ergonomic design enabling efficiency and comfort
- Reduce risks of fuel spills and damage to the infrastructure
- Reduces hand arm vibration (HAV)

On-Track Impact Wrench

D-Handle Impact Wrench

Dual Speed Rail Drill
